

Weekly Coal Production

DOE/EIA-0218(93-49)
Production for Week Ended:
December 4, 1993

EIA

Energy
Information
Administration

SUMMARY—As estimated by the Energy Information Administration (EIA) from data on railroad car loadings, U.S. coal production totaled 18 million short tons during the week ended December 4, 1993. This was 21 percent higher than in the previous week, which included the Thanksgiving Day holiday, and 7 percent lower than in the comparable week in 1992. Production east of the Mississippi River totaled 10 million short tons, and production west of the Mississippi River totaled 8 million short tons. The Bituminous Coal Operators' Association and the United Mine Workers of America have reached a tentative agreement on a contract to end a seven-month strike.

Bituminous and Lignite Total	18,207	15,110	19,509	948,081	987,318	-4.0
U.S. Total	18,272	15,165	19,568	952,617	990,738	-3.8
Railroad Cars Loaded	118,195	98,161	125,152	6,103,756	6,327,650	-3.5

* For quantity data, the value of the number is less than 0.5 thousand short tons. For percentage calculations, the absolute value of the number is less than 0.05 percent.

Notes: 1993 data are preliminary. Total may not equal sum of components because of independent rounding. Bituminous and Lignite Total includes bituminous coal, subbituminous coal, and lignite. The States in the Appalachian Region are Alabama, Eastern Kentucky, Maryland, Ohio, Pennsylvania, Tennessee, Virginia, and West Virginia. The Interior Region States are Arkansas, Illinois, Indiana, Iowa, Kansas, Western Kentucky, Louisiana, Missouri, Oklahoma, and Texas. The Western Region States are Alaska, Arizona, California, Colorado, Montana, New Mexico, North Dakota, Utah, Washington, and Wyoming.
